Objective

I'm a dedicated Frontend Developer with a keen aspiration to transition into a well-rounded Full-Stack Developer. Proficient in front-end technologies, driven to craft seamless user experiences, and eager to fortify back-end capabilities. Committed to propelling innovation and growth within a dynamic team, while steadfastly absorbing new technologies for enhanced contributions to company success.

Education

2017-2019
SENIOR HIGH SCHHOOL
Technical Vocational Strand - ICT
Computer Programming

Experience

FRONT-END DEV   2022-Present
FREELANCING
I do freelance to support myself in the pandemic times, this we're the time I considered myself as a working student also.
- Learned to manage my time
- Practiced a lot of things related to programming and web development
- Become proficient in communicating effectively to clients

FRONT-END DEV   2023
GROUND GURUS - OJT
- Learned to collaborate in projects
- Become aware of the vast world of programming Languages and Frameworks

Project

QUEUEWISE
A queueing system made for Business Permit Licensing Office (BPLO) in Municipality of Biñan, Laguna. It is used in the event Business One Stop Shop(BOSS) in January 2024. It provided seemless and streamlined queueing. It is made by our team consisting 4 members. MEAN Stack is used in developing the app and packaged with electron-packager.
- Harnessed my skill in web development
- Have and opportunity to practice full-stack dev
- Enhanced my collaboration Skills
- Improved my leadership skills

Non-technical Skills

- Effective Communication
- Self Management
- Creativity
- Problem Solving
- Leadership

- Continuous Learning with best practices and technologies
- Computer Literate (MS Tools and Google tools)
- Fast Learner

Achievements
- President's Lister
- Dean's Lister
- Iskolar ng Binan Beneficiary
